6. The online cake ordering system allows users to browse a variety of cakes by category, flavor, and occasion, complete with detailed descriptions and images. Users can register, log in, and manage their orders through a personal dashboard. The ordering process includes selecting a cake, customizing options like size and message, entering delivery details, and making secure payments via an integrated payment gateway. Admins can manage cake inventory, track orders, and handle user accounts through an admin panel. Users receive order confirmation emails and can track delivery status. The website is fully responsive, providing a seamless shopping experience on all devices. Buy a Cake is a portal which allows admin in developing counters to advertise and sell their cake. This would permit rural communities to make their wares available to the rest of the world. The proposed system is to develop the website for cake store. User can buy the nearby cake available in app. An E Com App is a portal which allows admin in developing products to promote and sell their goods. This would permit rural communities to make their wares available to the rest of the world.

14. ReNewMarket, a dynamic online marketplace, connects buyers and sellers of second-hand goods with ease. The website features a broad range of categories, including electronics, furniture, clothing, and collectibles. Key functionalities include user registration and login, a user-friendly listing creation tool for sellers, and advanced search and filtering options for buyers. Listings include detailed descriptions, photos, and pricing information, with the option to negotiate prices directly with sellers. Users can track their transactions, leave feedback, and manage their favorite items and notifications. The platform also provides secure payment options and a simple process for arranging item pick-ups or deliveries. ReNewMarket aims to provide a reliable and convenient space for exchanging pre-loved items while promoting sustainability

15. EasyToll, an advanced online toll payment system, simplifies the process of managing toll fees for drivers. The website allows users to register and log in to access their toll account, where they can view and pay outstanding toll charges from various toll gates. Key functionalities include real-time toll balance updates, automatic payment options,and the ability to add or update vehicle details. Users can view detailed transaction history, set up recurring payments for frequent routes, and receive notifications for upcoming toll charges. The platform also supports secure payment methods and provides a user-friendly interface for managing toll accounts and reviewing payment summaries. EasyToll aims to enhance the convenience of toll payments and reduce wait times at toll booths, This website should help the user to pay toll in advance therefore not to wait in queue while travelling.

Admin:

- Login
