Experiment – 1:

1. A local library needs a website to streamline operations and enhance user experience. The site will include a catalog for searching and viewing books, user accounts for borrowing and managing books, and an admin dashboard for managing inventory and user data. Essential features include a search function, book details page, user login system, and contact form, the system helps both

students and library managers to keep constant track of all the books available in the library. It allows both the admin and the student to search for the desired book. It becomes necessary for colleges to keep a continuous check on the books issued and returned and even calculate fines.

Librarian Admin:

Login

Add Book

Update/Delete Book

Issue Book for student

Return Book Status

Make Fine

Update material (year, semester wise)

View material

User:

Login

Register

Search Book

My Borrow History Book

Issue Date, Exp Date

Check Fine

Search material (year, semester wise)

Download material
